EXPERIENCE

Systems & Cybersecurity Engineer

Sep 2023 - Present

Cognizant Technology Solutions

Chennai

- Designed and built **end-to-end full-stack systems** with a strong focus on **system design and architecture**, developing **CVE-aware** applications using **ReactJS, TypeScript, Java, and Python**, supporting **10k+ monthly active users** and maintaining **99.9% service availability**.
- Engineered and optimized data layers across **relational and NoSQL databases**, applying **query optimization techniques** and **concurrency controls** to eliminate race conditions, reducing average query latency by **30-40%** and improving data reliability through **automated backup and recovery workflows**.
- Owned features from **design to production**, enhancing existing codebases using **Rust**, scaling functionality to handle **2-3x traffic growth**, writing **unit and edge-case tests** to improve coverage by **25%+**, and continuously improving system performance and reliability across the **software development lifecycle**.
- Prompt engineered **30+ GenAI-driven workflows** and built **LLM-powered system components**, focusing on **clean abstractions, safe execution, and extensible architectures** rather than one-off solutions.
- Participated in **design and code reviews** and led systematic **debugging of complex production issues**, analyzing failures across **application logic, APIs, and dependent services** to improve overall system reliability and quality.
- Led the engineering team & supported **identity and access management (IAM) solutions** for over **100,000+ identities** across **Okta, Microsoft Entra ID, and Active Directory**, driving **application integrations, automated identity lifecycle management** and **L2 operational workflows** to ensure secure, scalable, and compliant access controls.

TECHNICAL SKILLS AND INTERESTS

Programming Languages: Python, Java, Go, Rust, TypeScript

Frontend: React.js, Next.js, HTML5, CSS3

Backend: REST APIs, FastAPI, Spring Boot

Computer Science Fundamentals: Data Structures, Algorithms, Object-Oriented Design

Databases: PostgreSQL, MySQL, MongoDB

Systems & Scale: Distributed Systems Basics, API Design, Performance Optimization

PROJECTS

High-Performance In-Memory Cache Engine (Rust)

Aug - Sep 2025

Built a **Redis-compatible in-memory cache server** exploring **lock-free concurrency, eviction algorithms (LRU, LFU, ARC), TTL handling, async networking, and append-only persistence**, supported by **benchmarking** and **flamegraph-based performance profiling** using Rust, Tokio, DashMap, Redis RESP Protocol, Criterion, Flamegraph

LLM-Powered Automation Orchestrator

Mar - Jul 2025

Designed and implemented a **modular GenAI-driven orchestration system** combining **LLM-based reasoning** with traditional backend services, enabling secure **IAM-integrated workflows** such as identity queries and operational actions through **RBAC enforcement, input/output sanitization, and enterprise knowledge base integration** using Python, FastAPI, LangChain, PostgreSQL

Adaptive Load-Aware Task Scheduler

Feb - Mar 2025

Built a **Go-based intelligent task scheduler** that dynamically assigns jobs to workers using **real-time CPU, memory, and latency feedback**, leveraging **priority queues, concurrency primitives, and feedback-driven scheduling algorithms** to **outperform round-robin and static schedulers** in throughput, latency, and resource utilization using Goroutines, Priority Queues, Prometheus, Grafana

EDUCATION

Bachelor of Technology in Computer Science and Engineering (Cyber Security)

2019-23

Veltech University, Chennai

CGPA: 9.02

Higher Secondary School (10th | 12th MPC)

2017-19

Maria M.H.S.S., Chennai

Percentage: 96 | 77.5

ACHIEVEMENTS & CERTIFICATIONS

Certified Speed Typist Ratatype certification: 68.4 WPM, 98.8% accuracy

Jul 2025

2xBronze | Coral | Amber Award Development Support excellene & mentoring 100+ cohorts

2023 -2025
