| Senior Systems Engineer & Freelancer                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 2019 - Sep 2023 - Present |
| Cognizant Technology Solutions                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Chennai                   |
| <ul style="list-style-type: none"><li>Designed and implemented <b>full-stack SaaS systems</b> using <b>React, TypeScript, Python (FastAPI), and Node.js</b>, integrating <b>GenAI-powered components</b> for intelligent workflows while ensuring <b>multi-tenant design</b>, secure authentication, API-first development, and scalability aligned with <b>OWASP and cloud security best practices</b>.</li><li>Led and contributed to <b>cybersecurity and identity (IDAM) initiatives</b>, maintaining and enhancing <b>IAM solutions</b> across <b>on-prem, cloud, and hybrid environments</b>, and managing <b>100,000+ identities</b> across <b>Okta, Microsoft Entra ID, and Active Directory</b>.</li><li>Led rapid innovation initiatives including a <b>one-week GenAI MVP challenge</b>, acting as <b>design architect and lead developer</b> to deliver a fully functional AI solution under strict time and token constraints using Cursor as development arena.</li><li>Automated <b>40+ L2 and 10+ L3 operational workflows</b> using <b>PowerShell, APIs, and event-driven automation</b>, reducing manual effort by <b>50%</b> and achieving approximately <b>40% cost savings</b>.</li><li>Accumulated <b>7 years of hands-on experience</b> through a combination of freelance work, internships, and independent projects, building and refining <b>full-stack systems, distributed platforms, and security-focused applications</b>.</li><li>Continuously experimented, failed, and iterated across technologies and architectures to develop strong intuition in <b>system design, SaaS engineering, and security-first product development</b>.</li></ul> |                           |

TECHNICAL SKILLS

**Frontend:** React.js, TypeScript, Next.js, Tailwind CSS  
**Backend:** Python, FastAPI, Node.js, REST APIs  
**GenAI & Automation:** LLM Integration, Agent Architectures, Prompt Engineering, n8n Workflows  
**Security & IAM:** Microsoft Entra ID, Okta, SailPoint, CyberArk, OWASP Practices  
**Databases:** PostgreSQL, NoSQL Datastores, Vector Databases  
**DevOps & Cloud:** Docker, Kubernetes, CI/CD Pipelines, Cloud-Native Architectures  
**Observability:** Monitoring, Logging, Security Dashboards

| OWASP SOC Suite                                                                                                                                                                                                                                                                                                                                                                                                            | Aug 2025 - Present |
| Designed and actively developing a <b>plug-and-play IAM and SOC platform</b> supporting IdP integrations, automated user lifecycle management, <b>SSRF mitigation</b> , proactive monitoring, and API-first extensibility. Architected for scalability, security, and future <b>open-source release</b> .                                                                                                                  |                    |
| N8N Automation Portfolio                                                                                                                                                                                                                                                                                                                                                                                                   | Jul - Dec 2025     |
| Built a comprehensive collection of <b>AI-powered n8n automations</b> , including automated onboarding, sentiment analysis, AI customer support agents, inbox management via web UI, resume screening, business lead generation, viral ad and video creation, LinkedIn automation, AI avatar videos, and YouTube content pipelines—demonstrating <b>event-driven SaaS workflows</b> and rapid productization.              |                    |
| Enterprise GenAI Platform                                                                                                                                                                                                                                                                                                                                                                                                  | Jan - Dec 2024     |
| Designed and led the development of an <b>enterprise-grade GenAI platform</b> delivering conversational and agent-based assistance for <b>IAM, PAM, and IGA</b> . Integrated <b>SailPoint, Okta, CyberArk, and Microsoft Entra ID</b> to automate identity operations and access governance with <b>RBAC enforcement, secure execution, and auditability</b> . Successfully demonstrated to <b>5+ enterprise clients</b> . |                    |
